About ATSTN

The Advanced Therapies Skills Training Network (ATSTN) is a national initiative established to drive growth across the advanced therapies and vaccine manufacturing industry.

The network offers employers access to state-of-the-art training facilities, an all-encompassing online training platform, and an innovative career tool, which collectively, address the UK's unprecedented demand for skills.

“

The sector is predicted to double over the next five years with manufacturing offering the biggest employment opportunities. ”

– 2021 UK Cell and Gene Therapy Skills Demand Survey Report.

How ATSTN supports your organisation

1 Developing skills

We help your teams upskill and reskill through well-established and innovative training options, to ensure they have the competencies required for key roles in the sector.

2 Driving growth

With the right talent in place, grow your capabilities in response to the demands of this rapidly expanding sector.

3 Delivering excellence

Our programmes are industry-approved and recommended, allowing us to deliver excellence through our offering to ensure your teams are poised to do the same.

Career Converter

The Career Converter is a new, cutting-edge tool that helps individuals measure their transferable skills against key roles within the advanced therapies and vaccine manufacturing sector.

Who is it for?

From individuals in their early careers to those wanting to upskill or retrain, the Career Converter provides a great starting point for anyone already within the sector, in a similar one, or even from outside it.

Perfect for your organisation

With the aim of supporting your organisation's recruitment process, the Career Converter can help identify candidates' gaps in skills, and signpost them to the most appropriate resources and training solutions. The tool is also the perfect starting point for upskilling and retraining your teams during times of growth and change.
